Cherish Water and Love Taiwan

To draw international attention to water resource issue, the United Nations marked 2005-2015 as the "Water For Life Decade". 2015 is the end of this 10-year global campaign, and, coincidentally Taiwan has just been suffering with the worst drought in 67 years this year. The Far Eastern Group launched "Taiwan Water—Fountain of Life" Exhibition to invite the public to "cherish water and love Taiwan"!

5
MUST-SEE
ATTRACTIONS

- * **Open umbrella to watch the sensational display! (1st Floor Water Bank)**
Simulate the real torrential rain and drought, watch display with umbrella, and reflect on the issues resulted from extreme climate.
- * **Gigantic globe screen's image impact! (3rd Floor)**
180cm diameter globe screen, 360° image presentation, to see the water disaster that humans faces under the blue Earth.
- * **Universal illusion of the water puddle's world! (3rd Floor)**
Is there any other water source in the outer space? Through LED water puddle to experience the illusion of the universal water source.
- * **Experience fetching water with African oil barrels! (1st Floor Plaza)**
Hand carrying yellow oil barrels to feel the difficulty in fetching water of the African people.
- * **Good water, such lightness, the secret of weight! (2nd Floor)**
Lost weight! Specially designed scale to measure the weight of water composition within human body.

Exhibition Introduction and Direction

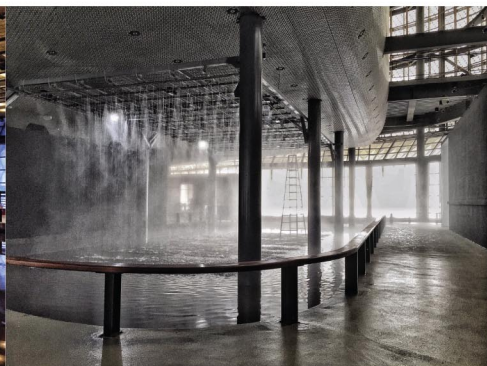

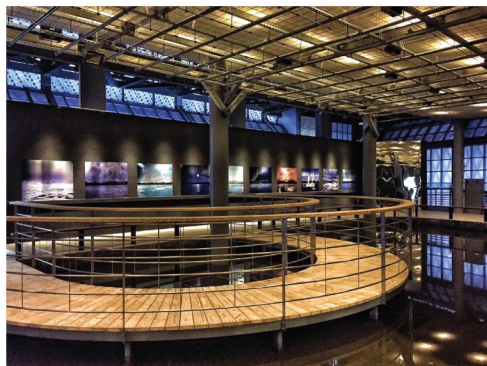

1st Floor
Exhibition

Reflection of the Extreme Climate— Reality Experience of the Strongest Torrential Rain & Drought

WATER & ENVIRONMENT

Taiwan's average annual rainfall is 2.5 times the world's average. However, useable water resource is no more than 20% of the rainfall.

Under extreme climate, "torrential rain" and "drought" are two major environmental issues that are challenging Taiwan.

↑ Watch the display with umbrella! You should never miss the reality experience of the torrential rain show every half hour!

↑ Watch closely 360 ° the gigantic globe screen to understand the relations between water and the Earth.

The Only Planet with Water – 180cm Diameter Gigantic Globe Screen to Penetrate the Secrets of Water

WATER & EARTH

The Earth is the only planet covered by liquid water among the eight planets in the Solar System. How much you know about the looks of water?

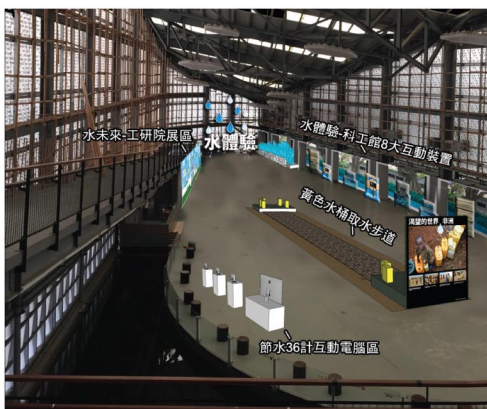

↑ Precious water resource is treasure hidden under the city.

Living by the Water— Water Knowledge that You Must Know, Challenge Your Understanding about Water!

WATER & CITY

For you and I living in the city, turn on the faucet, you get easy access of clean water. Imagine one day, when you turn on the faucet and nothing comes out of the pipes. How would that make you feel?

↑ To foresee the new future of science and technology, proceed with the efforts of Water Loving Fighters.

Water Experience— Most Practical Water Science of Our Daily Lives, Experience the Difficulty in Fetching Water of the African People

WATER & CITY

The Far Eastern Group collaborated with United Daily News Group, Industrial Technology Research Institute, National Science and Technology Museum, to jointly establish the scientific, applicable, and interactive experience zones.

Cherish Taiwan Water, Sustain Fountain of Life
 “Water Show” through visual, sound and interactive devices
 highlights the importance of water to life, demonstrates Taiwan’s
 water resource issues,
 and invites you to jointly cherish water and love Taiwan.
